British Columbia Hydro & Power Authority

I was responsible to have web-based training developed for our lockout program at B.C. Hydro. I went out for competitive bids and selected the bid that was very much lower than the others.

CommLab India demonstrated expertise in developing effective e-learning courseware for us. It was delivered on time and within budget. The level of quality was beyond our expectation.

Here is a note I received this month from the Manager of our largest plant:

I thought I would share some feed back that I received from a couple of American millwrights this week on the quality of the CBT. To quote them, "We have worked all over the USA and Canada and have never taken an orientation like the one you have. It is easy to go through and you come out with a real good understanding. This is a world class system that you have here."

I worked with RK and the group at Commlab India for several months, conferencing Friday mornings. I enjoyed the discussions and always appreciated their eager desire to meet our needs. I highly recommend Commlab India for designing, developing or assessing your e-learning courseware.

About British Columbia Hydro & Power Authority

As the third largest electric utility in Canada, BC Hydro serves customers in an area containing over 94% of British Columbia's population. BC Hydro endeavours to provide energy solutions to its customers in an environmentally and socially responsible way by balancing British Columbians' energy needs with the concerns of the environment.

About CommLab India

CommLab India (www.commlabindia.com) is a Custom eLearning Solutions Company based in India. Since 2000, it has been providing state-of-the-art eLearning services to organizations across the world in the areas of Learning Consultancy, Custom Courseware and Learning Technology. Some of our reputed clients are BC Hydro, George Washington University, Kawasaki and Deloitte. We are preferred vendors to some of the Fortune 500 companies like Alcoa, Unilever and Pepco Holdings Inc.
